Learn a Simple System to Daytrade the NASDAQ, S&P, DOW & Russell 2000 E-mini Futures Markets as well as FOREX If you are tired of banging your head against the wall trying to take money out of the market this book is for you. Every day followers of this technique are pulling anywhere from 10 to 40 YM points out of the market in two to five trades while risking no more than 15-points per trade in most cases and often much less. This technique uses simple tools and does not require any special software (ie.. Tradestation, Ensign, Esignal, etc...) although you will better off having a solid charting application that lets you train when you want. The system will work on other markets including listed stocks, FOREX and commodities. This is a simple and easy to follow scalping system using basic indicators and is based on a
sound foundation. Following this system you will be on the right side of the trend and will quickly be able to determine when to trade and when to sit tight.
