Solve any building air quality problem
A complete reference for the design of air filtration systems and HVAC systems used in homes, schools, hospitals, laboratories, or animal facilities, this book offers complete descriptions of each of the major technologies currently used for air disinfection. Each subject, chemical or microbial, is treated in sufficient detail to allow the design of these components to solve specific building air quality problems.
Design solutions for control of gases and odors
Recommended technologies and methods to combat biological terrorist weapons in HVAC systems
Diagnosis of air quality problems
Complete airborne pathogen database for the identification of infection risk
