The aim of this book is to provide illustrations of ways in which psychoanalytic ideas can be adapted and used in a wide variety of community settings--including social services, schools and hospitals--to help children and families who are emotionally disturbed or who have been physically or sexually abused. It is a book for professionals who are interested in using psychoanalytic ideas in their own work settings and assumes no previous knowledge of these ideas on the part of the reader. "The Emotional Needs of Young children and Their Families" provides basic principles, many practical examples, further reading and information about where to find support and consultation.
