This fully updated new edition of "Teaching practice for early childhood" will help new and trainee early childhood teachers to make the most of their teaching in a variety of early years' settings. Chapters cover vital topics such as ways of knowing and relating to children, the early childhood curriculum, and working collaboratively with colleagues and parents. In addition, this new edition takes into account changes in the early childhood curriculum, including fresh material on: the importance of social and emotional development; the role of observation in assessing children's learning and growing; and the use of documentation as a form of accountability and teacher research, and the importance of socially responsive learning environments.
