

Automatic Speech Recognition On Mobile Devices And Over Communication Networks

[DOWNLOAD HERE](#)

Networked, Distributed and Embedded Speech Recognition: An Overview.- Speech Coding and Packet Loss Effects on Speech and Speaker.- Speech Recognition over Mobile Networks.- Speech Recognition over IP Networks.- Distributed Speech Recognition Standards.- Speech Feature Extraction and Reconstruction.- Quantization of Speech Features: Source Coding.- Error Recovery: Channel Coding and Packetization.- Error Concealment.- Algorithm Optimizations: Low Computational Complexity.- Algorithm Optimizations: Low Memory Footprint.- Fixed-point Arithmetic.- Software Architectures for Networked Mobile Speech Applications.- Speech Recognition in Mobile Phones.- Handheld Speech to Speech Translation System.- Automotive Speech Recognition.- Energy-aware Speech Recognition for Mobile Devices. EAN/ISBN : 9781848001435 Publisher(s): Springer, Berlin Discussed keywords: Internet Format: ePub/PDF Author(s): Tan, Zheng-Hua - Lindberg, Boerge
